Total Spend by Supplier

Late Delivery Rate vs. Defect Rate by Supplier

Bubble Size = Total Spend (BRL)

Key Supplier Insights

1. **Delta Parts** has the highest late-delivery rate (**52%**) and is among the suppliers with the highest defect rates (**2.86%**).
2. **Phoenix Materials** has the highest defect rate (**3.20%**), above the average of **1.81%**.
3. **Atlas Components** combines a below-average late-delivery rate (**40%**) with a low defect rate (**0.82%**), making it the best overall performer.
4. **Horizonte Parts** shows average performance, with room for improvement in delivery timeliness.

Q1 — Prioritize

Upper right • 9 parts
High spend | High price gap
Prioritize price negotiations.

Q2 — Negotiate

Upper left • 21 parts
Low spend | High price gap
Target quick negotiation wins.

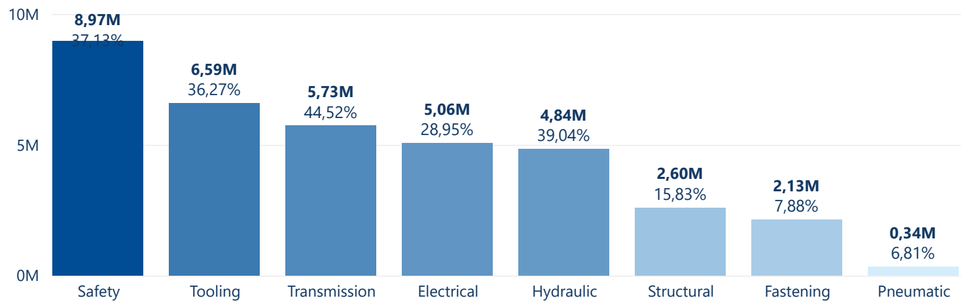

Q3 — Maintain

Lower left • 46 parts
Low spend | Low price gap
Maintain terms and monitor prices.

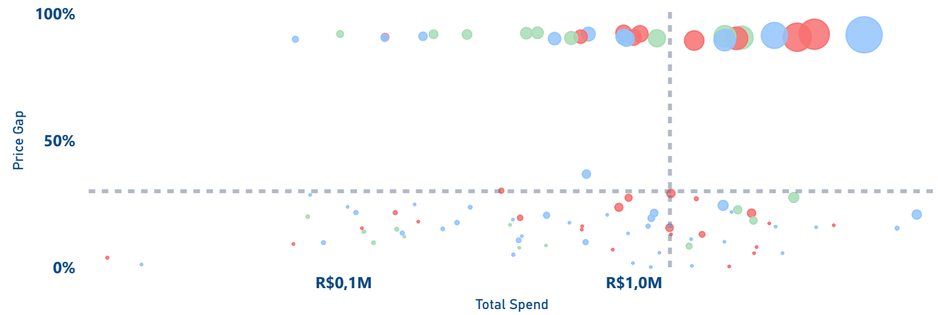

Q4 — Optimize

Lower right • 24 parts
High spend | Low price gap
Review volume discounts and contracts.

Savings Potential by Category

Parts Prioritization Matrix

10 Recommended Actions

No	Action	Type	Estimated Impact	Priority
1	Negotiate parts with price differences above 30%	Negotiation	19.218.757,07	High
2	Reduce supplier dependency for critical parts	Diversification	11.603.777,85	High
3	Prioritize negotiations in the Fastening category	Negotiation	7.252.361,16	High
4	Review suppliers with the highest delay rates	Supplier Management	6.889.743,10	Medium
5	Reduce defect rates among critical suppliers	Quality	5.439.270,87	Medium
6	Consolidate purchases of high-spend parts	Procurement Strategy	3.626.180,58	Medium
7	Reassess low-competitiveness items	Procurement	2.900.944,46	Medium
8	Continuously monitor price fluctuations	Market Intelligence	2.175.708,35	Low
9	Expand the strategic supplier base	Diversification	1.450.472,23	Low
10	Establish periodic price reviews	Governance	1.087.854,17	Low

Key Insights

- **9 high-spend** parts are negotiation priorities.
- **30 parts** have price gaps above **30%.**
- Safety leads potential savings at **R$8.97M.**
- **46 parts** have low spend and low price gaps, maintain terms and monitor prices.

Conclusion

The analysis identified **30 parts with price gaps above 30%**, including **9 high-spend negotiation priorities**. **Safety offers the largest potential savings at R$8.97M**, highlighting a key opportunity for cost reduction.
